

MANUFACTURER OF
**MACHINERY PRODUCTS FOR
THE PULP AND PAPER INDUSTRY**

ABOUT OUR COMPANY

R.R. Engineers has provided machinery products for Pulp and Paper Industry since 1994. We have qualified on the path of success at a fast pace. The entire credit goes to the optimism and strong team attitude of everyone who is part of us. We as a team strongly believe in "Let us win together", and Customer Satisfaction is our top priority. Our approach makes us stand out from the general league.

R. R. Engineers offered products are widely used by Kraft, Tissue, Writing Printing and Hard Board Paper Mills. R. R. Engineers also specializes in Refiner Discs, one of the best Disc available for Paper mills across the globe.

Every product manufacturing organization is based on customer specifications. At R. R. Engineers, we take this equation further and contribute significantly to your vision by suggesting multiple. We are a leading manufacturer and Exporters of Refiner Disc and other products in India. We currently have a majority market in India, Nepal, Bangladesh, Uruguay, Abidjan, South Africa Nigeria and UAE.

There are many areas where we score more than other competitors in the industry, and some of our specialities make us a preferred business partner from our clients. We offer our products at the best competitive prices without compromising our quality; our commitment to delivering products within the stipulated time frame is the important factor of our business.

INTRODUCTION

R.R.Engineers is a leading manufacturer of machinery parts for pulp & paper industries. We have been serving the paper industry since 1994, and at that time, we started with a tiny segment and an efficient team. We were manufacturing and supplying TDR and DDR Refiner Discs only to local market areas; later, with time, we reached the peak as per the increased demand of the market. We started supplying our Refiner Disc product to other cities in India, and we have 80+ satisfied customers in the Indian market.

Since 2016, we have been exporting our Refiner Discs and other machinery parts to 8+ countries around the globe, as we were consistent in supplying the optimum quality and reliable products at the best competitive prices.

MANUFACTURING DIVISION

Our base structure is well equipped with new machines like heavy-duty lathes, extra heavy-duty surface grinders, dynamic balancing machines, universal milling machines, mould machines, a furnace for heat treatment and casting, shot blast machines and many more. All types of Refiner discs prepared by us are built in-house to fulfil our esteemed customers' requirements.

Also, we have an in-house pattern development team for a new product. So we can customize Disc and other products as per our customer requirements.

QUALITY ASSURANCE

We focus on creating valuable products and process innovation with quality; when we develop valuable products for our customers, we create goodwill for ourselves. Our most popular products are TDR and DDR Refiner Disk plates and fillings, which are dynamically balanced and delivered ready for installation. We prepare Refiner discs in different tooth widths, groove widths and Bar angles per your customers' requirements and machinery's requirements.

We are pleased to inform you that our REFINERS DISCS are renowned for their quality and workmanship across the length and breadth of the country. We are glad to add that we supply Refiner Disc with the best quality and economical price.

Refiner Disc gives better refining with superb performance. We assure you that our products are of world-class quality, and we provide a 100% warranty of products.

TDR REFINER DISC

INDUSTRIAL PULP VALVES

We provide our clients with qualitative Pulp Valves that includes molded Pulp Valves and paper Pulp Valves. These valves are well known for its high tensile strength and corrosion resistance. Available in variety of sizes, these Pulp Valves find application in various sectors such as paper and pulp industrial, commercial, residential.

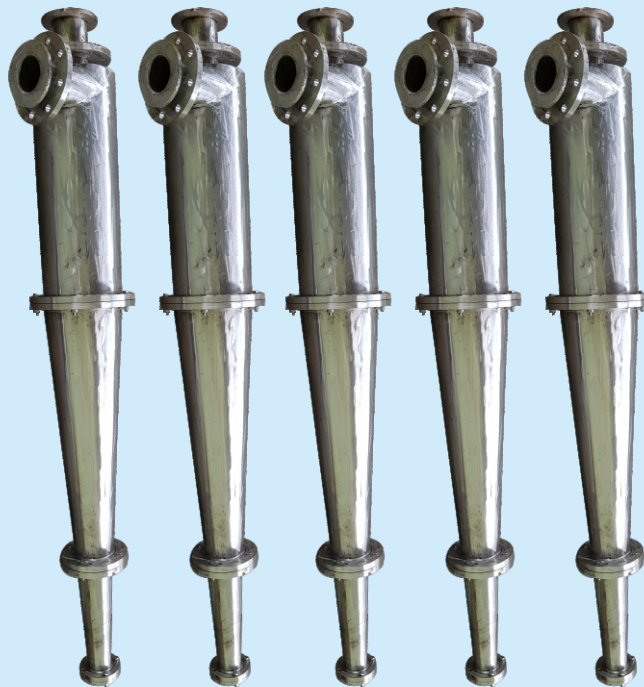

CENTRI CLEANER BOTTLE

Centri cleaners bottles are designed to remove air, dirt, shives and specks from pulp stock efficiently and economically. Its smooth internal surface and small diameter ensure outstanding performance.

Benefits:

- Efficient removal of contaminants like sand, glass, chips, pins etc. from the pulp stock.
- Efficient removal of impurities like dirt, shives and specks.
- Simple installation.
- Improved optical cleanliness of paper due to removal of specks shives & dirt.
- The small cone diameter resulting in outstanding cleaning efficiency.
- SS-304 Construction.

PRODUCT CUSTOMIZATION

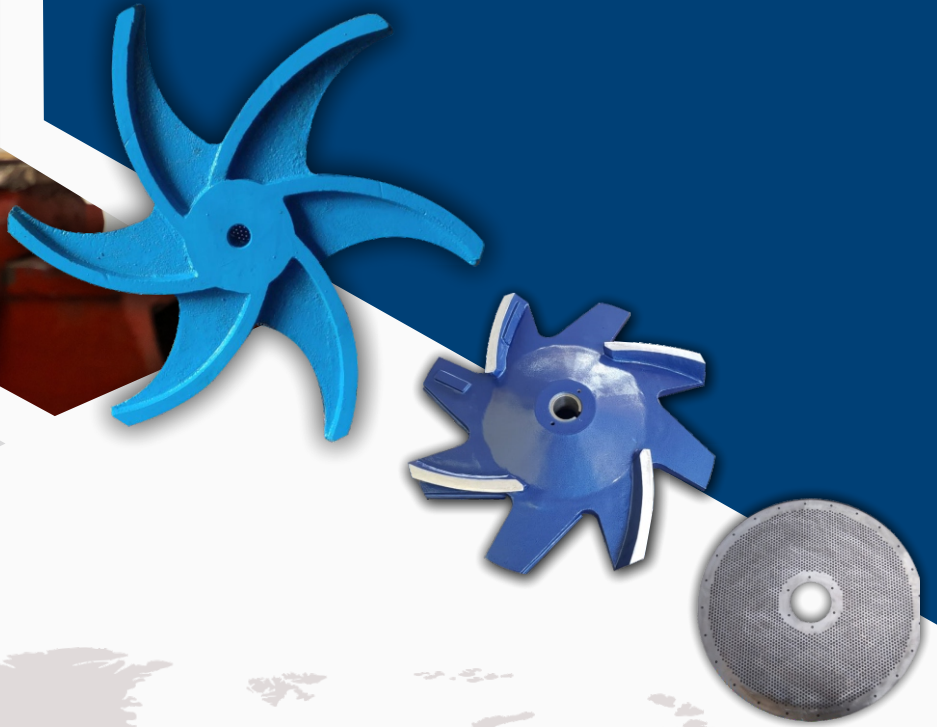

Every product manufacturing organization is based on customer Specifications. At R.R.Engineers, we take this equation further and contribute significantly to your vision by suggesting multiple solutions. We are India's leading Manufacturer and supplier of customized refiner discs and other paper machinery products.

We offer our products at the best competitive prices without compromising our product quality. Our commitment to delivering the product within the stipulated time frame is the most important factor of our business.

WHY CHOOSE US ?

- 28+ year's experience in refiner disc manufacturing
- One off the leading supplier of refiner disc from india
- Alloy steel and CA-40 grade material casting
- Dynamic disc balancing for quality performance
- Provide 100% warranty of products
- High production rate and longer life
- Customize all products as per customer specifications
- More than 90+ satisfied clients around the globe
